SEPTEMBER 1955 PRICE 35 CENTS 40¢ IN CANADA

SPECIAL!

**35^{MM}
ISSUE**

*now available...the
film designed for
highest resolution*

This famous film, designed specifically for small cameras and big enlargements, is now available in the United States. Its unique *ultra-thin* emulsion and unusually fine grain give superb resolution; make ADOX a "must" for superior small camera work. ADOX always means contact print quality, even with considerable enlargement. From now on, when you want film that will do justice to the resolving power of your fine lenses, ask for ADOX.

ADOX film is manufactured by Dr. C. Schleussner Fotowerke, GmbH, Frankfurt a. M., Germany, one of the oldest manufacturers of film and photochemicals. ADOX is now being distributed in the United States exclusively through franchised Leica dealers. ADOX is made in three speeds: KB-14 (ASA 16); KB-17 (ASA 32) and KB-21 (ASA 80).

UNEXPECTED ACTION and exuberant expressions usually can be stopped when you set the Δ shutter speed upwards of 1/100 second. Here everything is in focus from approximately six to fifteen feet. Whether you're shooting a street scene or sports events, it's a good idea to pre-set shutter, lens opening and focus. Then you can be sure of catching most actions that occur within the predetermined limits indicated on the depth of field scale of your camera.
